

# METAL ROOFING STANDING SEAM

Our wide range of colors is carefully designed to complement today's residential styles—whether you want a full standing seam roof or just an accent over a porch or bay window. Each panel is finished with premium PVDF “cool color” coatings, engineered for exceptional fade and chalk resistance while reflecting heat to help keep your home cooler in the summer.

Unlike many metal roof systems made for agricultural or industrial use, our TCM-LOK standing seam panels are designed specifically for homes. With a sleek, concealed fastening system and no exposed screws, these panels deliver a clean, modern look while allowing for natural thermal movement without buckling or warping.

## FEATURES

Premium PVDF coatings perform well in all climates, providing exceptional fade and chalk resistance.

Sleek concealed fasteners create a clean, modern look with no exposed screws.

Manufactured from USA-made G90 galvanized steel for superior strength and durability.

Snap-lock design allows natural thermal movement to minimize buckling or warping.

Low-maintenance system built to last for decades with minimal upkeep.

Reflective “cool roof” finishes help improve energy efficiency and reduce utility costs.
